WARRANTY EXTENSION

- ES** Para prolongar la garantía de su producto, dirijase a www.sfa.biz, seleccione su país y regístrelo.
- PT** Para prolongar a garantia do seu produto, consulte www.sfa.biz, escolha o seu país e registe-o.
- PL** Aby przedłużyć gwarancję produktu, należy wejść na stronę www.sfa.biz, wybrać swój kraj i zarejestrować produkt.
- CZ** Chcete-li prodloužit záruční lhůtu vašeho výrobku, navštivte www.sfa.biz, zvolte vaši zemi a v sekci "Poprodejní servis" výrobek zaregistrujte.
- RO** Pentru a prelungi garanția aferentă produsului dumneavoastră, accesați www.sfa.biz, alegeți țara de reședință și înregistrați produsul.

1 SAFETY

WARNING: This device may be used by children who are at least 8 years old, by people with reduced physical, sensory or mental capacities or those without knowledge or experience, if they are properly supervised and if the instructions relating to using the device completely safely have been given to them and the associated risks have been understood. Children must not play with the device. Cleaning and maintenance undertaken by the user must not be carried out by unsupervised children.

ELECTRICAL CONNECTIONS: Only carry out the electrical connection once the installation is complete.

The electrical installation must be done by a qualified electrical engineer. The device must be placed so that the power supply socket is accessible.

Devices without plugs must be connected to a main switch on the power supply which disconnects all poles (contact separation distance of at least 3 mm).

The device's power supply must be connected to ground (class I) and protected by a high sensitivity differential circuit breaker (30 mA).

The connection must be used exclusively to provide the power to the product. If the power cord is damaged, to prevent possible danger, it must be replaced by the manufacturer, customer service team or a similarly qualified individual.

REGULATION: Be sure to comply with the provisions of the standard in force in the country of use (France: NFC 15-100) concerning the protection volumes in a bathroom.

2 APPLICATIONS

This unit is a compact pumping station designed to evacuate wastewater from a horizontally vented toilet, basin*, shower*, bidet*. (* depending on the model). This device meets the EN 12050-3 standard and European standards on electrical safety and electromagnetic compatibility. DoP (Declaration of Performance) available on our website in the product file ("Diagrams and technical data sheet" tab)

3 INSTALLATION

The shredder must be in the same room as the toilet and any other sanitary facilities that may be connected. The device must be easily accessible for checks and maintenance.

The installation and operation of your device must comply with local regulations and EN 12056-4.

In order to optimise the latest technical developments in acoustics included with this device, it is important to:

- install the tank ensuring that it does not touch a wall of the room,

- position the tank on a perfectly level floor so that the anti-vibration pads can work effectively,
- fix the outlet piping correctly avoiding any distances between attachments in excess of one metre.

4 ACTIVATION

Operate the flush several times. The toilet bowl outlet must be free of leaks. Check that the connections with the sanitary devices do not leak: WC, shower*, bidet*, basin* (* depending on the model).

5 MAINTENANCE**WARNING!!**

In case of prolonged absence, it is imperative to cut off the general water supply and to protect the installation against frost.

CLEANING/DESCALING

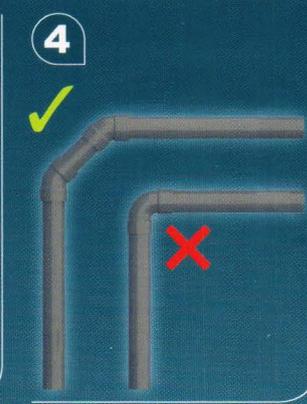

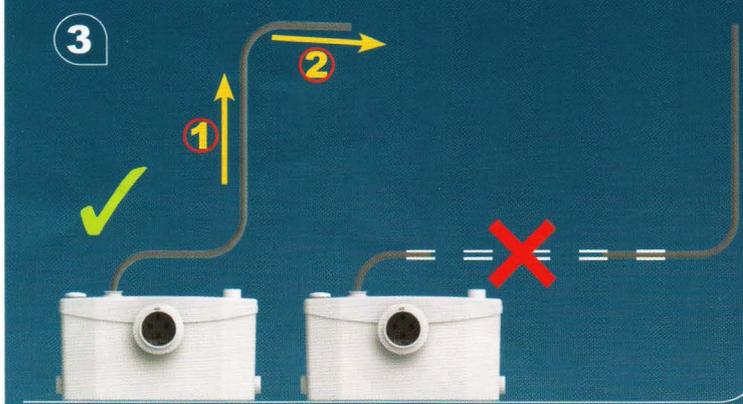

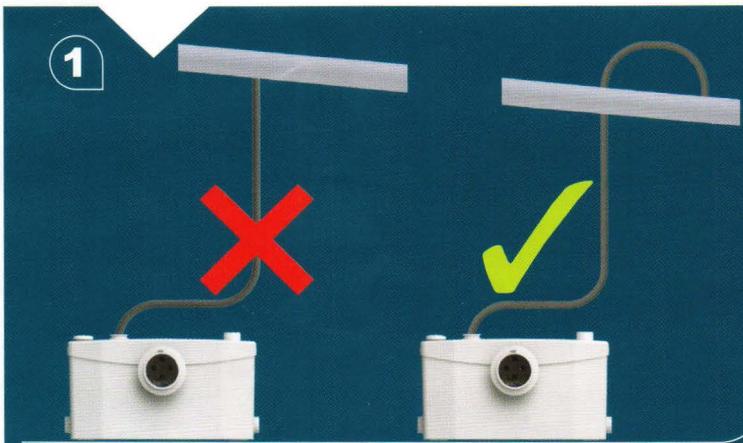

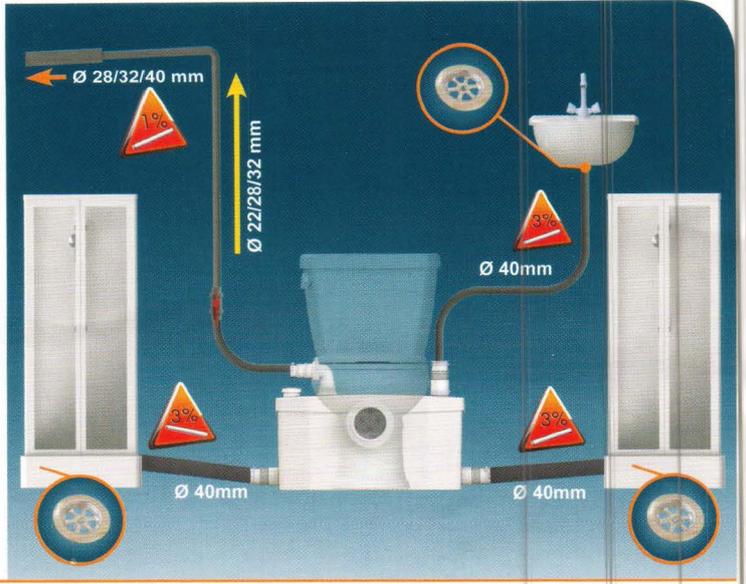

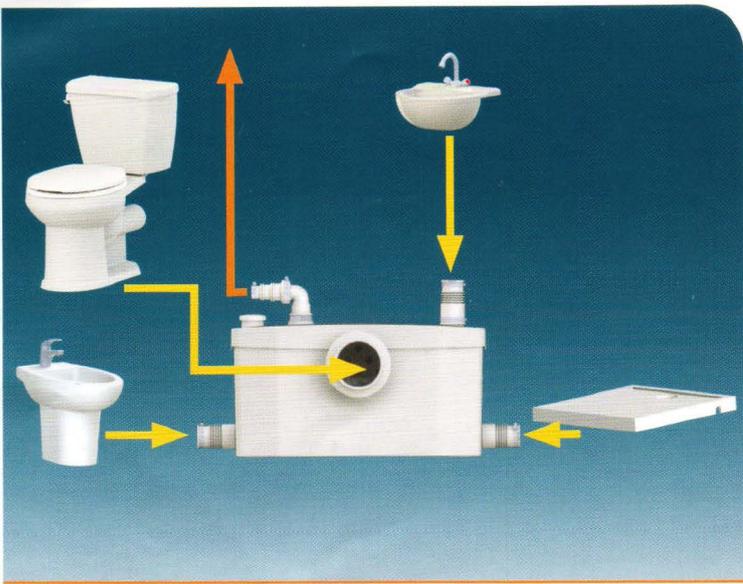

To descale and clean the shredder and bowl, use the special SFA SANIBROYEUR descaler regularly, which is designed to remove scale while respecting the internal parts of your device.

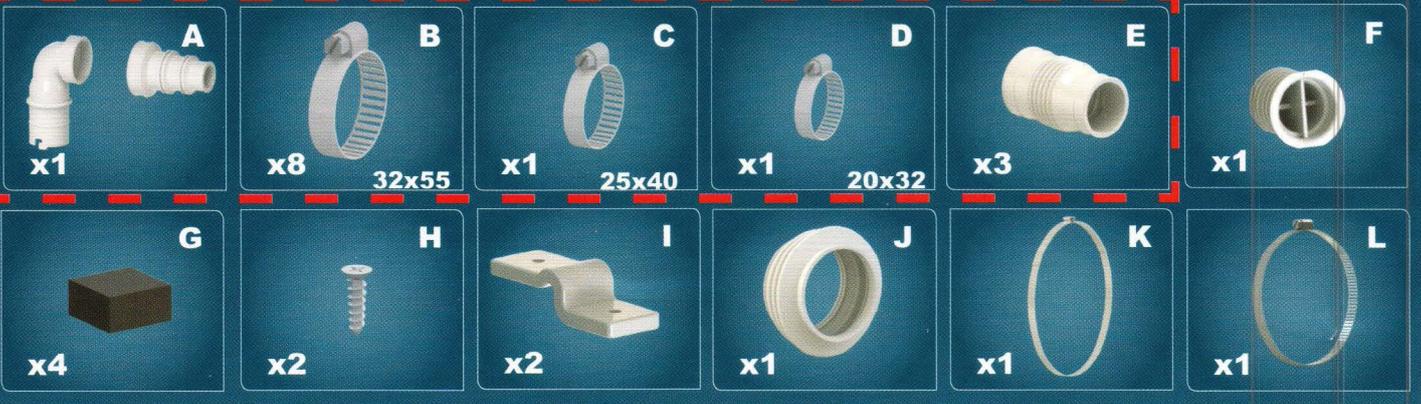

6 POSSIBLE MAINTENANCE WORK**DISCONNECT THE ELECTRICAL OUTLET**

FAULT	PROBABLE CAUSES	ACTION TO BE TAKEN
<ul style="list-style-type: none"> • The motor doesn't start 	<ul style="list-style-type: none"> • Device not connected • Defective power supply • Problem with a motor or control system 	<ul style="list-style-type: none"> • Connect the device • Check the power supply • Consult an approved engineer
<ul style="list-style-type: none"> • The motor runs with a rattling noise or buzzes and does not run 	<ul style="list-style-type: none"> • Motor blocked by a foreign body • Problem with a motor or control system 	<ul style="list-style-type: none"> • Remove the foreign body • Otherwise consult an approved engineer

<ul style="list-style-type: none"> • Motor runs correctly but does not stop or runs for a long time 	<ul style="list-style-type: none"> • The evacuation height or length is too great (loss of load) • Hydraulic problem, clogging 	<ul style="list-style-type: none"> • Go over the installation again • Otherwise consult an approved engineer
<ul style="list-style-type: none"> • The device stops 	<ul style="list-style-type: none"> • The device has been running for too long (overheating safety cut-off) 	<ul style="list-style-type: none"> • Wait for it to restart. • Call an authorised service technician if necessary
<ul style="list-style-type: none"> • The engine runs and the water slowly falls into the bowl 	<ul style="list-style-type: none"> • The vent on the lid is clogged • Motor problem 	<ul style="list-style-type: none"> • Unclog the vent hole • Otherwise consult an approved engineer
<ul style="list-style-type: none"> • Cloudy water coming back into the shower (devices with side inlets) 	<ul style="list-style-type: none"> • Shower installed too low in relation to the shredder • Side inlet flaps clogged 	<ul style="list-style-type: none"> • Review the installation • Clean the flaps • Otherwise consult an approved engineer
<ul style="list-style-type: none"> • Odours come from the U-bend of the hand washer 	<ul style="list-style-type: none"> • The U-bend of the hand washer is empty 	<ul style="list-style-type: none"> • Install a vacuum breaker
<ul style="list-style-type: none"> • The water of the hand washer does not drain automatically 	<ul style="list-style-type: none"> • Clogged hand washer U-bend • Problem with the automatic control system 	<ul style="list-style-type: none"> • Clean the U-bend • Consult an approved engineer

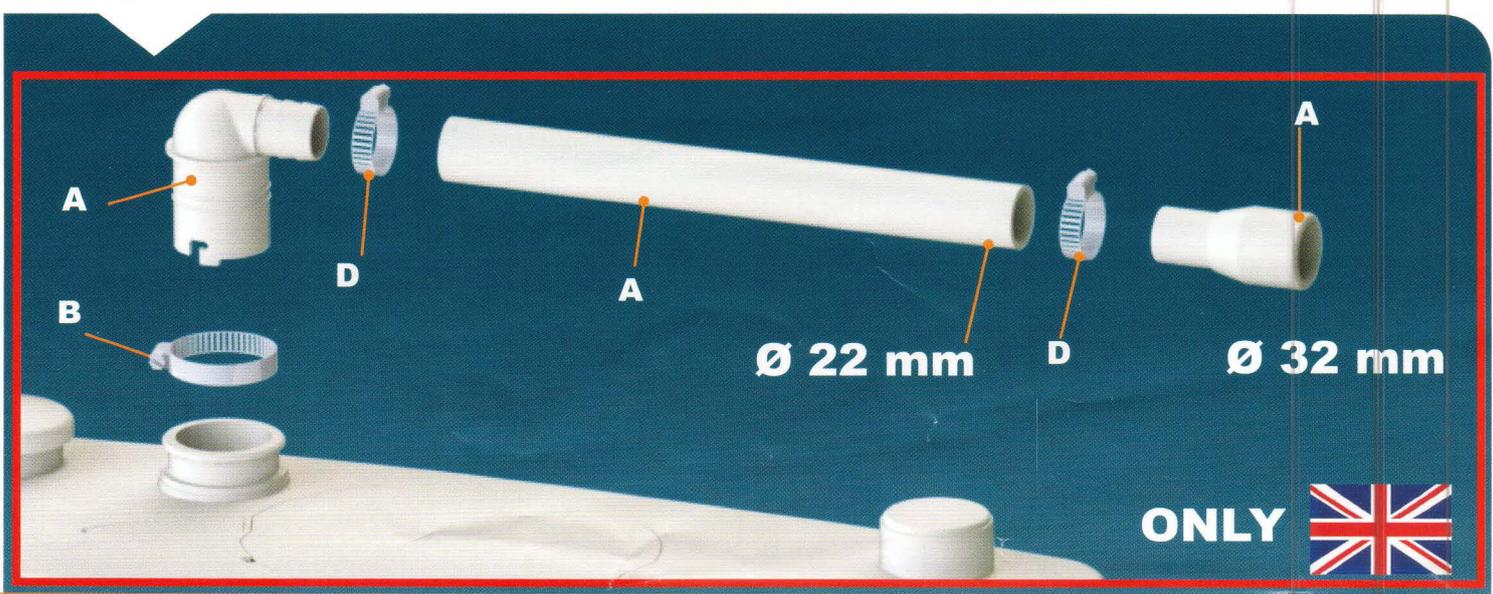

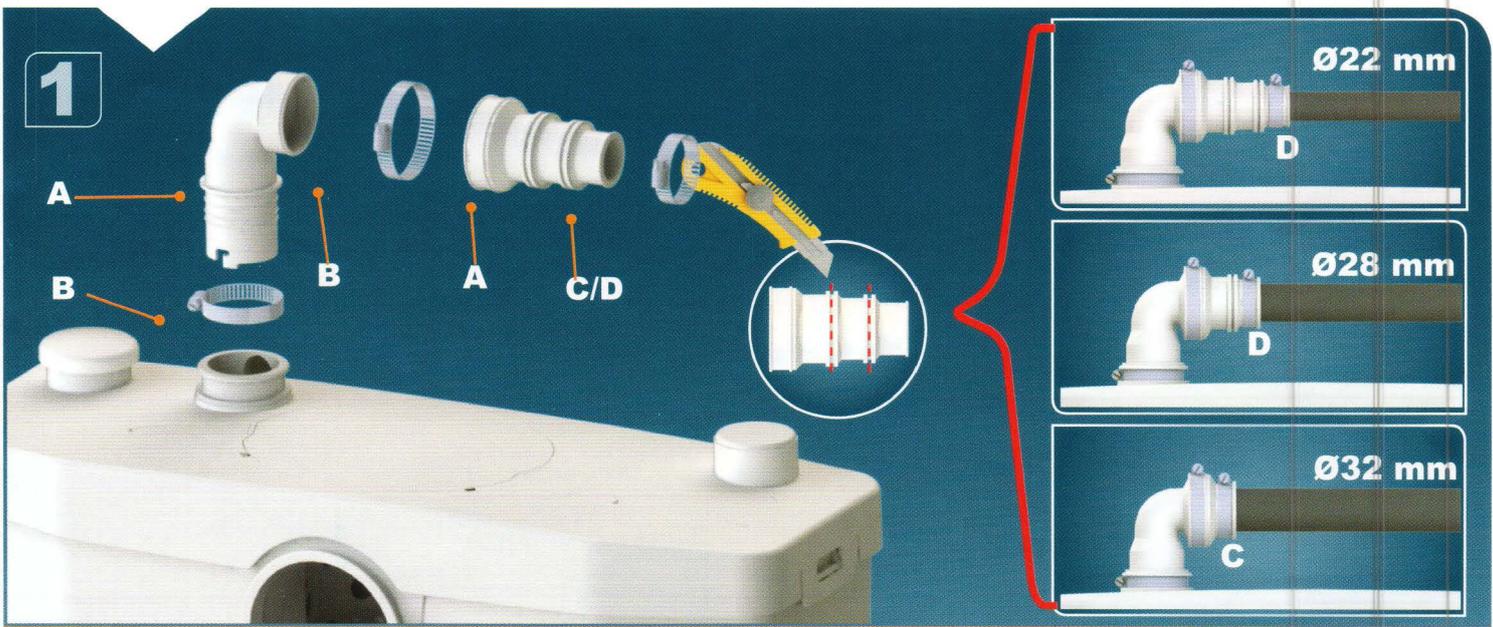

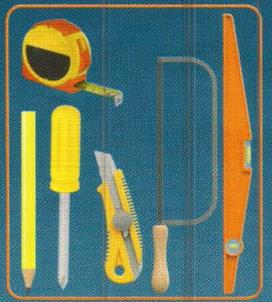

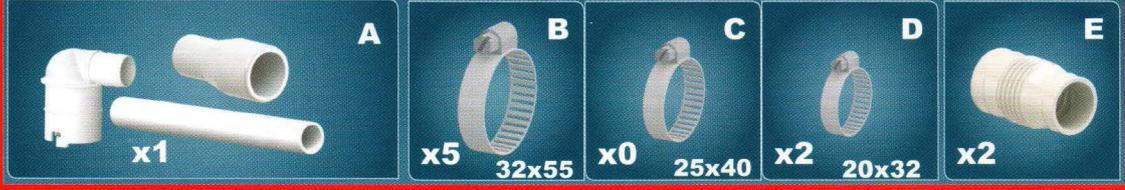

7 WARRANTY CONDITIONS

The device is guaranteed for two years from the date of purchase subject to installation, use and maintenance in accordance with this manual. Only the evacuation of toilet paper, faeces and sanitary water are covered by this warranty. Any damage caused to the appliance by the shredding of foreign bodies such as cotton, tampons, sanitary pads, wipes, foodstuffs, condoms, hair, objects made of metal, wood or plastic, or the pumping of liquids such as solvents, oils or acids are not covered by the warranty.

Ten Golden Rules for Correct Saniflo Installation

1

All horizontal pipes should have a minimum fall of 1:100. Discharge pipework should be copper or rigid solvent weld plastic, not 'pushfit'.

2

If a vertical run is needed, this should be at the start of the run (within 30cm of the unit) and from the high point there must be a minimum fall of 1:100 (see rule 1).

3

Bends should be smooth/long radius, not tight elbows. (Examples of copper and plastic shown.)

4

Pipes entering the Saniflo should have a gravity fall of 1:33.

5

Where the pipework falls to a floor lower for example, fit an air admittance valve at the highest point capable of withstanding 10psi pressure, or increase pipe size coming down to 'break' syphon.

6

Each Saniflo discharge pipe should run separately to the soil pipe. If wastes are combined, it can only be into a larger pipe, which is on a gravity fall.

7

The unit should be easily accessible and removable in the event of maintenance being required. If boxed in, the boxing should be easily removed. Any extension between the WC pan spigot and wall should not exceed 150mm.

8

As close coupled cistern dimensions vary it may be necessary with certain designs to utilise a spacer between cistern and wall.

9

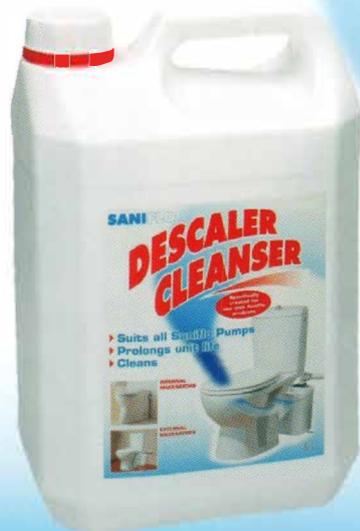

Position the Saniflo behind the toilet not underneath it.

10

Electrical connection should be via an unswitched fixed wiring connector with a 5 amp fuse.

DESCALER CLEANSER

- ▶ Suits all Saniflo Pumps
- ▶ Prolongs unit life
- ▶ Cleans

Care for and extend the lifespan of your appliance with SFA descaler. Specially designed to be kind to SFA components: rubber membrane, cutter blades and all plastic components.

Pflegen Sie Ihr Gerät und verlängern Sie seine Lebensdauer mit dem SFA-Entkalker. Speziell für die Komponenten von SFA entwickelt: Gummimembrane, Messer, Kunststoffen...

Utrzymuj i przedłużaj żywotność swojego urządzenia, używając środka do usuwania kamienia SFA. Opracowany specjalnie dla komponentów SFA : membrana gumowa, noże, elementy z tworzyw sztucznych itp.

Prodlužte životnost svého přístroje pomocí pravidelné aplikace přípravku proti usazování vodního kamene. Speciálně vyvinut na ochranu funkčních součástí přístroje SFA (gumová detekční membrána, nerezové nože, vnitřní plastové rozvody ...) a dezinfekci jeho vnitřního prostoru.

通过SFA清洁剂维护设备并延长其使用寿命。本品设计特别适合SFA组件：橡胶膜、刀轮和塑料部件
